STEWART COLLECTION

GATES & RAILINGS

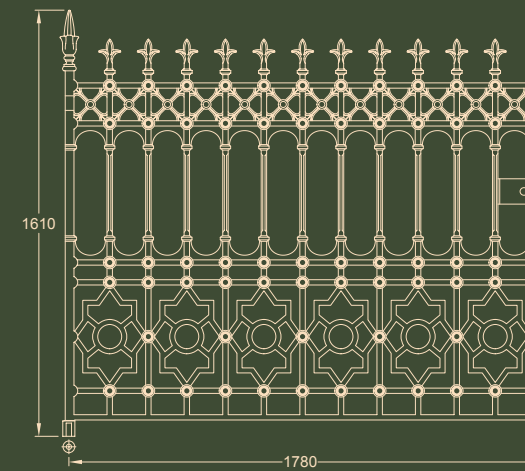

This authentic range of cast iron gates and railings has been inspired by 19th Century design, originating in Falkirk at the famous Sun Foundry, circa 1892. The foundry was owned jointly by Cameron Harley Snr. and his partner Colin Stewart. These particular patterns proved extremely popular, and played a significant part in the foundry's success. Crafted in solid cast iron with an equal passion, and using the same traditional time honoured techniques as those who made the originals, they represent the finest quality available today.
